

## Concerning SOAP Transfers

After extensive internal discussion at both senior and junior moderation levels, it has been decided that there is no clear benefit, and an unacceptable level of risk to the server, to continue to offer SOAP transfers.

Primary among these considerations is the fact that SOAP transfers, while also having legitimate uses, were being increasingly used to facilitate pirated software functioning correctly. This is obviously and blatantly against the core ethos of NH.

Instructions and utilities exist in the wild for SOAP transfers. The information relating to SOAP transfers, the mechanisms behind them and other such details are not necessarily private.

However, we ask that SOAPs, and methods or details of performing SOAPs, are not discussed in the server, in keeping with the rules regarding other prohibited content.

We understand this decision will disappoint some of you, and we apologise for the inconvenience, but we expect that you will understand this decision was not made without due consideration to the longevity of the server, and our relations (whatever they may be) with Nintendo.
